

## SRM Test Recovery Steps.

The screenshot displays the vSphere Site Recovery interface. The browser address bar shows the URL: <https://srm-01a.corp.local/dr/#/sitepair/all/706b710a-0f5a-46a4-802c-d07d93972e0a/6d4889d6-24cf-4004-8727-58c49a32f...>

The navigation bar includes: Site Pair, Replications, Protection Groups, and Recovery Plans. The left sidebar shows a search bar and a list of recovery plans, with 'Sales Application Recover...' selected.

The main content area shows the 'Sales Application Recover...' plan details. The 'Recovery Steps' tab is active, displaying a list of steps:

Description: This plan is ready for test or recovery

View: Test Steps

Recovery Step	Status	Step Started	Step Comp
> 1. Synchronize storage			
2. Restore recovery site hosts from standby			
3. Suspend non-critical VMs at recovery site			
> 4. Create writable storage snapshot			
> 5. Configure test networks			
1 6. Power on priority 1 VMs			
2 7. Power on priority 2 VMs			
> 3 8. Power on priority 3 VMs			
4 9. Power on priority 4 VMs			

At the bottom, the Windows taskbar shows the 'Site Recovery - Goog...' application and the system tray with 'ENG 7:32 AM'.

## SRM Recovery Steps.

The screenshot displays the vSphere Site Recovery interface. The browser address bar shows the URL: `https://srm-01a.corp.local/dr/#/sitepair/all/706b710a-0f5a-46a4-802c-d07d93972e0a/6d4889d6-24cf-4004-8727-58c49a32f...`. The page title is "Sales Application Recove...". The "Recovery Steps" tab is active, showing a list of 12 steps:

1. Pre-synchronize storage
2. Shut down VMs at protected site
3. Resume VMs suspended by previous recovery
4. Restore recovery site hosts from standby
5. Restore protected site hosts from standby
6. Prepare protected site VMs for migration
7. Synchronize storage
8. Suspend non-critical VMs at recovery site
9. Change recovery site storage to writable
10. Power on priority 1 VMs
11. Power on priority 2 VMs
12. Power on priority 3 VMs

The interface also includes a search bar, a left-hand navigation menu with "Recovery Plans" selected, and a bottom taskbar showing the system tray with the time 7:33 AM and language set to ENG.

## SRM Cleanup Steps

The screenshot shows the Site Recovery console interface. The main content area displays the 'Sales Application Recove...' recovery plan. The 'Recovery Steps' tab is active, showing a list of four steps, all of which have a 'Success' status. The 'View: Cleanup Steps' dropdown is visible. The console also shows navigation tabs for Site Pair, Replications, Protection Groups, and Recovery Plans. The bottom of the screen shows the Windows taskbar with the time 7:35 AM and language set to ENG.
